• 14 Day Money Back Guarantee •

I have never marketed a product that has such immediate results from everyone. With the company offering a 14-day, 100% money back guarantee, I saw this as a win/win situation for everyone! People really want to feel better and The Chi Machine® always works in a positive way. I realized I could turn in eight orders and that would allow me to get a free Chi Machine. I saw an achievable compensation plan. Not having any monthly quotas would allow the average person to be successful!

Beverly Grigsby  
President-Level Distributor

I also use The Chi Machine® in my practice. I am an Ophthalmologist - specializing in LASIK Laser Vision correction. I put my patients on The Chi Machine® before their LASIK procedure to help them relax their muscles locally.

I also recommend The Chi Machine® to patients; I feel anyone can benefit from using The Chi Machine®.

I think the medical profession is going to be hearing a lot about The Chi Machine® and its benefits as time goes along.

Nathan L. Lipton, MD

## History

The Chi Machine® Therapeutic Massager helps virtually anyone locally relax muscles with little or no conscious effort. Just recline, face-up on the floor with both feet placed in the specially designed footrest. The Chi Machine® rocks the entire body from side to side in a gentle undulating motion.

The Chi Machine® Therapeutic Massager is the culmination of 38 years of research and development by Dr. Shizuo Inoue, a medical visionary and the developer of the world renowned Chi Machine. The patented precision design of this innovative medical device utilizes optimum body positioning to achieve the ultimate in local muscle relaxation. This design also provides temporary relief from minor muscular aches due to overexertion.

Dr. Inoue spent decades researching the relationship between body movement and minor muscular pain & tension caused by fatigue or overexertion. He was inspired by watching goldfish swim. Dr. Inoue thought that perhaps the steady undulation causes the fish's whole body to be massaged and provides it with some of its benefits. He wondered what would be the effect on people if they could move like fish?

Engineers took his basic concept and created the technical design for The Chi Machine®. "The pattern of motion that the machine generates in the human body uses minimum effort and achieves maximum results," says Dr. Inoue. "It relaxes muscles locally, temporarily increases our comfort, adds temporary relief to minor tension in muscles from fatigue or overexertion. It can also increase our sense of comfort, through the temporary relief of minor muscle pain and aches, due to fatigue or overexertion."

**HTE provides a 14-day money back guarantee with a 2-year warranty on The Chi Machine®. All HTE products are repaired & serviced in the US, Canada & Mexico!**

The Chi Machine® vs. an imitation product's method of creating the swinging motion

## Features & Benefits

Massage is the manipulation of soft tissue for the purpose of increasing overall comfort by temporarily relieving minor muscular pain and discomfort caused by fatigue or overexertion. The first records of massage date back 3000 years to early Chinese folk medicine. Western civilizations were introduced to the benefits of massage by Greek and Roman physicians.

The Chi Machine® blends the ancient arts with modern technology for a unique experience. The Chi Machine® maximizes the movement of the body which helps to provide prompt temporary relief. Fatigue or excess physical exertion can generally lead to minor muscular aches, pains and tension. The Chi Machine® supports temporary relief from these conditions without creating undue stress to bodily structures or additional muscular overexertion.

Because the massage with The Chi Machine® is performed while you are reclining and relaxed, with weight removed from the spine, you will immediately notice a sense of extreme comfort and pleasure.

Since 1990, over one million Chi Machines® have been sold worldwide. The Chi Machine® has gained a tremendous reputation for its solid construction and outstanding benefits. Unlike many types of medical devices, The Chi Machine® is easy to use, providing excellent results without stress or injury to the body.

## How do I use my Chi Machine?

Place the machine on a rug. Lie on your back and place your ankles in the grooves of the footrest on top of the machine. Set the timer switch to activate the machine for the number of minutes you desire. First time users should start with 2-5 minutes.

The footrest will begin to move back and forth, carrying your feet briskly from side to side. This movement will carry up through your legs and torso, throughout your entire body, causing you to wiggle back and forth - that's right, like a fish swimming in water!

All you have to do now is relax and breathe deeply, letting The Chi Machine® rock you gently but firmly for a maximum of 15 minutes.

When the time is up and the machine stops, remain lying down for another two to five minutes, relaxing and breathing deeply, enjoying the remarkable comfort and the temporary feelings of relief.

Although The Chi Machine® is an effective and safe method of massage therapy, its use is NOT advised in the following situations without prior medical advice:

### The Mid Position

### The Goldfish Position

### The Stretched Back Position

epilepsy. Additionally, the Therapeutic Massager should not be used within 30 minutes after eating a meal. If severe pain occurs, it should be thoroughly investigated.
